

PROFESSIONAL SUMMARY

A technical writer with 4 years of experience writing documentation for enterprise software (B2B SaaS) to drive product adoption and enhance customer experiences (CX). Skilled in collaborating with subject matter experts (SMEs), like product managers (PMs), quality assurance (QA) and software engineers, designers, and other writers, to author clear, accurate, and concise content for both internal and external stakeholders. Adept in using component content management systems (CCMS), docs-as-code processes, and design tools to produce and deliver high-quality and scalable documentation, like release notes, administrator and user guides, code samples, and more.

WORK EXPERIENCE

Komodo Health

Technical Writer II, III || December 2021 – November 2025

Authored the release notes, admin guides, entity relationship diagrams (ERDs), and known issues (KIs) for Maven's Salesforce applications. Each product released 2 major versions and 3+ patches/hotfixes per year.

Created a documentation model for the Developer Experience (DX) team's high-code 0-to-1 product that had an IDE and a Python SDK with ~200 API endpoints. The first customer signed a \$22.5M, 3-year deal.

Advised the User Experience (UX) team on their high-fidelity mockups and design system and collaborated with SMEs to deliver clear and consistent copy and documentation across the MapLab product suite.

Built an internal documentation hub to streamline cross-team collaboration and reduce content redundancy.

Enhanced external knowledge bases by improving user flows and aligning with organizational rebrandings.

Established and revamped internal processes like candidate assessment, new-hire onboarding, and posting freezes to increase team efficiency.

Memorial Sloan Kettering Cancer Center

Associate Applications Analyst || July 2020 – July 2021

Published and maintained technical documentation for Power Platform projects and help desk tickets in a new internal knowledge base, streamlining collaboration and support for a 10-member team.

Designed, developed, and deployed no-code/low-code applications and automation workflows. Notable projects ensured the safety of 4,100+ COVID-19 frontline workers and streamlined communication for 30 project managers, release train engineers (RTEs), and senior leadership for MSKCC's digital transformation.

Analyst (Contract) || August 2019 – July 2020

Organized copy, created graphics, and set up blog sites and web pages in SharePoint to market the new API-governance initiative and enhance collaboration and communication in the organization.

Designed and implemented no-code/low-code mobile and tablet applications using Power Apps and Power Automate to resolve key pain points and improve workflow efficiency for 50+ internal customers.

VOLUNTEER EXPERIENCE

CUeLinks

Mentor || June 2023 – Present

BobaTalks

Mentor || March 2023 – December 2024

Unaffiliated

College Application Essay Tutor & Editor || September 2022 – January 2023

EDUCATION

Cornell University

B.A. with Distinction, 3.8 GPA || May 2019

Information Science major (UX concentration), Psychology minor
